Currently:
Tbilisi, Georgia

ABOUT

- 4+ years of development experience on .NET Framework and .NET Core.
- Effectively working both on small projects and supporting large legacy systems.
- Refactored systems into SOA and microservice architecture.
- Experience in mentoring and onboarding junior developers into projects.

Currently I am looking for an ambitious project with complex tasks and a modern technology stack.

PROFESSIONAL EXPERIENCE

[Approvalmax](#) || Remote from Georgia || 12.2022-Now

• Senior .NET Developer

- Development of a system for controlling the flow of financial documents by creating chains of responsibilities and approval workflows.
- Web application, monolith
- **Technologies: .NET 6/8, EF Core, MS SQL, PostgreSQL, Dapper, Azure tables/queues/jobs, XUnit, Terraform.**
- Develop business logic, connect the ability to pay through an external system (Airwallex) and by using Open Banking API for UK Banks (Yapily)
- Migrated solution from .NET 6 to .NET 8

[FORS](#) || Moscow (Remote) || 03.2021-12.2022

• Middle+ .NET Developer

- Development of a highly loaded payment message processing system for further calculating of charges, fines, and penalties.
- Microservices.
- **Technologies: .NET 5.0, Kafka, EF Core, PostgreSQL, XUnit, Docker, Redis.**
- Developed tax calculation logic and an ETL microservice for queuing messages. Mentored two junior developers during their onboarding time.

• Middle .NET Developer

- Development of a system for a visual representation of cash flows between companies in the form of a directed graph with the possibility of decomposing the graph into a tree.
- Web application, monolith.
- **Technologies: .NET Framework 4.7.2, LinqToDb, PostgreSQL, XUnit, IronPython, FluentValidation, FluentAssertion, Stimulsoft Report, EPPlus.**
- Refactored the legacy code. Rewrote a Monolithic application in SOA.

[NII Gazekonomika](#) || Moscow || 08.2019-03.2021

• Junior .NET Developer

- Development of a system for scheduling gas well drilling, taking into account resource constraints: time, budget, planned profit, planned capacity, etc.
- Desktop application, monolith.
- **Technologies: .NET Framework 4.5, WPF, ADO.NET, EF, SQL Server, MSTest, EPPlus.**
- Developed both the user interface and business logic, as well as the database structure
